PRECISION STEEL CASTINGS SINCE 1996

Forklift, Automobile
Truck, Train & Railway
Aerospace
Agricultural Machinery
Mining Machinery
Petroleum Machinery
Construction Machinery
Shipbuilding
Valve and Pumps
Power Equipment
Other Commercial
Industries

The group corporation has five casting factories which with powerful machining capabilities and one trading company, with an annual production capacity of precision castings more than 20,000 tons . Specializing in the manufacturing of lost wax investment castings and machined parts in carbon steel ,alloy steel ,stainless steel and high temperature alloy steel, and so on . Our company adopts two kind of production process , one is silica sol process and another one is compound process (water glass+silica sol), and it is equipped with several types of energy saving & environmental protection production lines including automatic and semi-automatic.

Precision Investment Casting

Carbon Steel, Alloy Steel, Stainless Steel, High Temperature Alloy Steel

CNC Machining

4 & 5 axis capabilities

Surface Treatment

Sand Blasting, Plating, Galvanized, Spray-Paint, Passivating, Polishing, Electrophoresis, Machining, etc.

Product Inspection

*X-Ray Inspection
Fluorescent Penetrate & Magnetic Particle
Spectroscopy & Tensile Testing
Hardness Testing
CMM Inspection
Pressure Testing
Impact Testing*

ERP Production Management

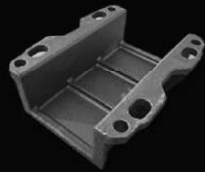

Product Traceability

Domestic & Global Manufacturing

VERTICALLY INTEGRATED

XJL Powertech offers comprehensive single-source capability, taking your projects from concept to completion.

XJL Powertech is a trusted partner to many of the world' s leading manufacturing companies. Looking for an innovative investment casting partner? One that provides outstanding service, exceptional quality, and low costs - all within short lead-times? Look no further than Shandong Xinjulong Power Technology Group Co., Ltd. for your casting needs.

Full-Service Casting Capabilities

Our group is accompanied by our full-service foundry, capable of fulfilling your custom needs. By partnering with us for your investment casting projects, you will benefit from the experience and capabilities of an industry leader. Whether you require complex cast components weighing just a few grams or large components of up to 350kg, or your needs include high volume, rapid prototype or short - run projects, you can count on the experience, innovation and dedication of XJL Powertech to work for you.

PROVEN SOLUTIONS

For over 25 years, XJL Powertech has supplied complete cast and machined parts to a wide variety of industries requiring steel castings.

Premium strength cast alloys

Thin walled, lightweight components

Tight tolerance, complex shaped castings

Rapid manufacturing for compressed delivery requirements

Equipped with various inspection methods to ensure quality

XJL Powertech employs the latest in technology in our investment casting process to produce high quality mechanical component parts, cost effectively and on time. We' re constantly seeking new technologies and innovative ways to improve our investment casting process, our efficiencies, our quality and reduce our lead time.

No.6698, Weizhou South Road, West of MaSi Village, Fangzi District, Weifang, Shandong, China.
